DETAILED ACTION

Claim Rejections under 35 U.S.C. 102(a)

I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

II. Claims 1-3,10,14,16,18-22 are rejected under 35 U.S.C. 102(a) as being anticipated by Rouchaud et al (Bulletin of Environmental Contamination and Toxicology, 1998, vol. 60 no. 4, pp. 577-84) or Viviani et al (Pesticide Biochemistry and Physiology, 1998, vol. 62 no. 2 pp. 125-134). Rouchaud or Viviani teaches a method of applying isoxaflutole (herbicide) to soil. It is well known in the art that herbicides control weeds. See abstract.

Claim Rejection under 35 U.S.C. 103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6,11,15,17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rouchaud or Viviani as applied to claims 1-3,10,14,16,18-22 above. See 102(b) rejection above. Rouchaud or Viviani teaches all that is recited in claims 4-6,11,15,17

Art Unit: 1616

except for the depth of the soil, amount of ingredient, and rate of release of ingredient. It would have been obvious to one having ordinary skill in the art to determine the optimum depth of soil for application of ingredient. One would have been motivated to do this in order to get the maximum control of weed growth in soil. With respect to delayed release or rate of release, the term is relative. Optimum amounts of ingredients would have been determined through routine experimentation.

Claim Objection

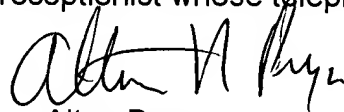

Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the instant invention comprising the encapsulation of an isoxazole compound.

Telephonic Inquiry
